

Create scenario-based courses across subjects

What Every Course Includes:

- Scope and sequence
- Standards alignment
- Lesson plans
- Adaptive, decision-based simulations
- Auto-graded assignments with feedback
- Reporting and insights
- Embedded tools to customize course content

Most AI tools help students avoid thinking.
immersionED requires it.

BUILDS COMPETENCIES

Reasoning, problem-solving, and communication in context.

DEEPENS UNDERSTANDING

Knowledge sticks when learners use it to think, decide, and explain.

MOTIVATES LEARNERS

High engagement through meaningful, choice-driven scenarios.

Quick Start Guide

- 1 BUILD ASSESSMENT METHOD** Use your syllabus, standards and rubric documents
- 2 IMPORT COURSE MATERIALS** Add worksheets, presentations, quizzes and more . . .
- 3 CREATE COURSE** Create course based on assessments and materials
- 4 CUSTOMIZE SETTINGS** Adjust details to make course harder or easier, as needed

Key Course Features

- Simulations and role play
- Lesson Plan templates
- Assessments
- Image Generation

Classroom Management Tools

Student Roster

Easily manage and organize student information

Progress Tracking

Measure reasoning, skills & understanding

Assignment Release

Control what your students see and when

Grading

Simple integrated tools and rubrics

Inventory

Store documents, rubrics, and student-visible materials
