AP Biology: Real-World Applications

Explore core AP Biology concepts through immersive, scenario...
License required

What Makes Us Different

1

LEARNING BY SIMULATION

Not passive lessons, students actively engage in real-world scenarios.

2

THINKING MADE VISIBLE

Every interaction reveals how students reason, decide, and respond.

3

ASSESSMENT IN REAL TIME

No separate testing. Understanding is measured as students think.

START WITH WHAT YOU HAVE

We turn a simple idea
into a course.

BUILD AROUND THINKING, NOT TEMPLATES

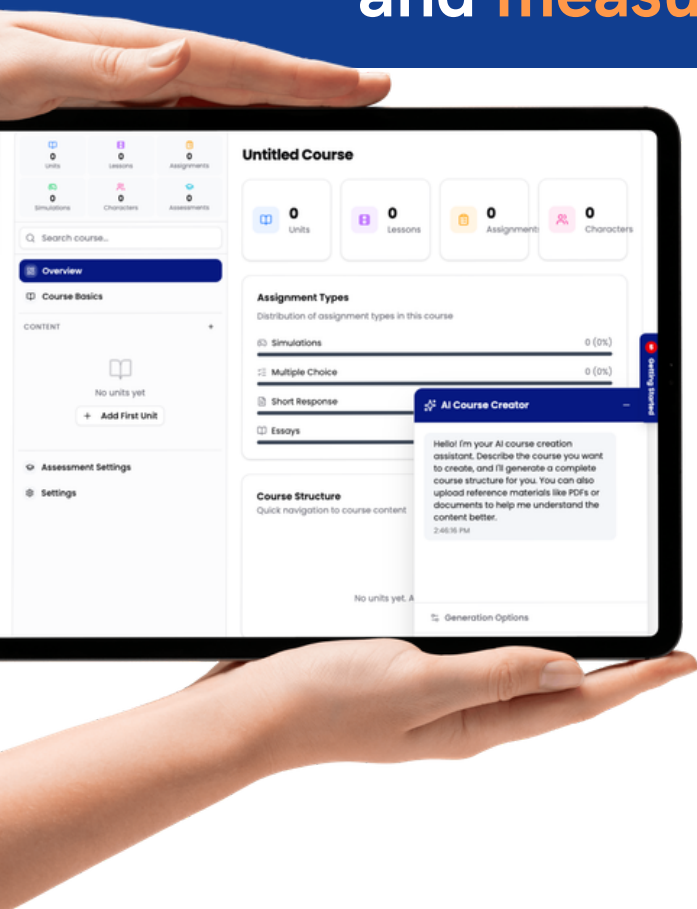

A complete course,
ready in minutes.

MAKE IT YOURS

Edit, refine, and align to
your exact vision.

Most tools generate **content**.
immersionED generates **thinking**
and **measures** it in real time.

Lesson, Assessment and Simulation.

This helps my students practice their most important skills, like developing an argument and justifying what they think... all without sacrificing content or time in the classroom.
